4G and 5G Private Cellular Networks

## Druid Software is an industry-leading provider of Private Cellular Network software for enterprise

Private Cellular Networks deliver the control, low latency and security demanded by enterprises. At Druid Software, we have 20 years experience in business-critical communications and have deployed our Evolved Packet Core with over 2,000 private networks on 5 continents.

### What we do

We offer unrivalled expertise in LTE and 5G private cellular core networks, working with Network Providers, Systems Integrators, RAN Vendors or End Customers in many industries:

Maritime

Healthcare

Public Utilities

Ports

Oil and Gas

Education

Safety & Defence

Aerospace

Manufacturing

Mining

Hospitality

## Raemis™

More than a core network

Druid's Raemis™ technology platform is comprised of a 3GPP compliant 4G/5G core, RestAPI and additional proprietary services, supporting a variety of 3rd party hardware and software.

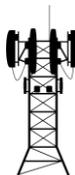

Scale up and down

Simple to use

Flexible Deployment

Radio Agnostic

Easy to Integrate

Device Prioritisation
